Summit County

Summit County is a second home to me, it is a place of work, life, and recreation in between my school and studies. Although I know the area well, spending time up there has given me a chance as a photographer to explore the mountains and lifestyle through the lens of a camera. Using square format film, I wanted to portray the essence of my experiences. Revealing the people, various locations and sights of significant importance to me. In capturing views, I began to construct a different sense of the mountain landscape. I decided to photograph a piece of the lifestyle that is universal to the recreation but can only be Summit County.
