Artist Statement:

My name is Olivia and I am a graphic designer. I have been interested in art my entire life. The artwork that I create does not seem like a job or an assignment because it is something that I love to do. For the graphics that I create I normally use Adobe Photoshop and Illustrator. I have recently been using Procreate on my iPad more and more. Since I have realized I want to go into sports graphics, I got an internship within the athletic department here at Colorado State. I love the internship because it is not just for one specific team on campus, it is for all of them. Doing graphics for different teams means every time I go into the office, it is a different thing every day. This also gives me the opportunity to work on different things and use different styles. I have created social graphics, a t-shirt design as well as ticket designs. While working at this internship, I also get to create for many different people and work with different people in different departments. The designs I create represent pride for the different sports teams on campus as well as pride in myself and my art style.

The graphics and illustrations I make mean so much to me when I see them being posted, used or worn. It is something that is so surreal to see that I am so proud of myself every time I see them. Seeing them also just makes me that much more motivated to keep doing what I want and I will get to where I want to go.
