

Kari Kok

My work is inspired by the natural world and the human response to nature. In spite of how many of us live detached from nature, in cities with lives governed by technology, we are still able to understand the powerful symbolism of nature. The symbols need little explanation, they are meant to be accessible to all, to illustrate the intrinsic human connection to nature. Our planet's ecological balance has been compromised and I feel that each of us must use the tools at our disposal to help preserve and restore the natural world. As an artist, I employ visual language to address these issues with the goal of awakening interest and inspiring my audience to action. Art has the power to make people see things in a new light. It allows us to develop a love for places and things that we would otherwise overlook or think of as dull.

FUSION

11th Colorado State University Colloquium
"Physics at CSU: Neutrinos to Nanoscience"

March 28 - 29, 2012

Main Ballroom, Hilton Hotel, Fort Collins

Program Director: Dr. John Harton
Professor and Chair, CSU Physics Department

www.vpr.colostate.edu

Sponsored by CSU Office of the Vice President for Research

Colorado State University

designed by Karl Koh

FRACKING NATION

Tracy Bank was concerned. A geochemist, she makes her living studying how water interacts with rocks. And four years ago, when she arrived at the State University of New York at Buffalo, water was definitely interacting with rocks.

Buffalo is perched on the edge of the largest known reservoir of natural gas in America, a geologic formation known as the Marcellus Shale (pdf). The 95,000-square-mile slab, which lies under sizable portions of West Virginia, New York,

FORGET ME NOT

In our busy lives, it is easy to overlook the natural resources that have helped sustain us throughout our life.

The earth has supported us and it's time for us to return the favor.

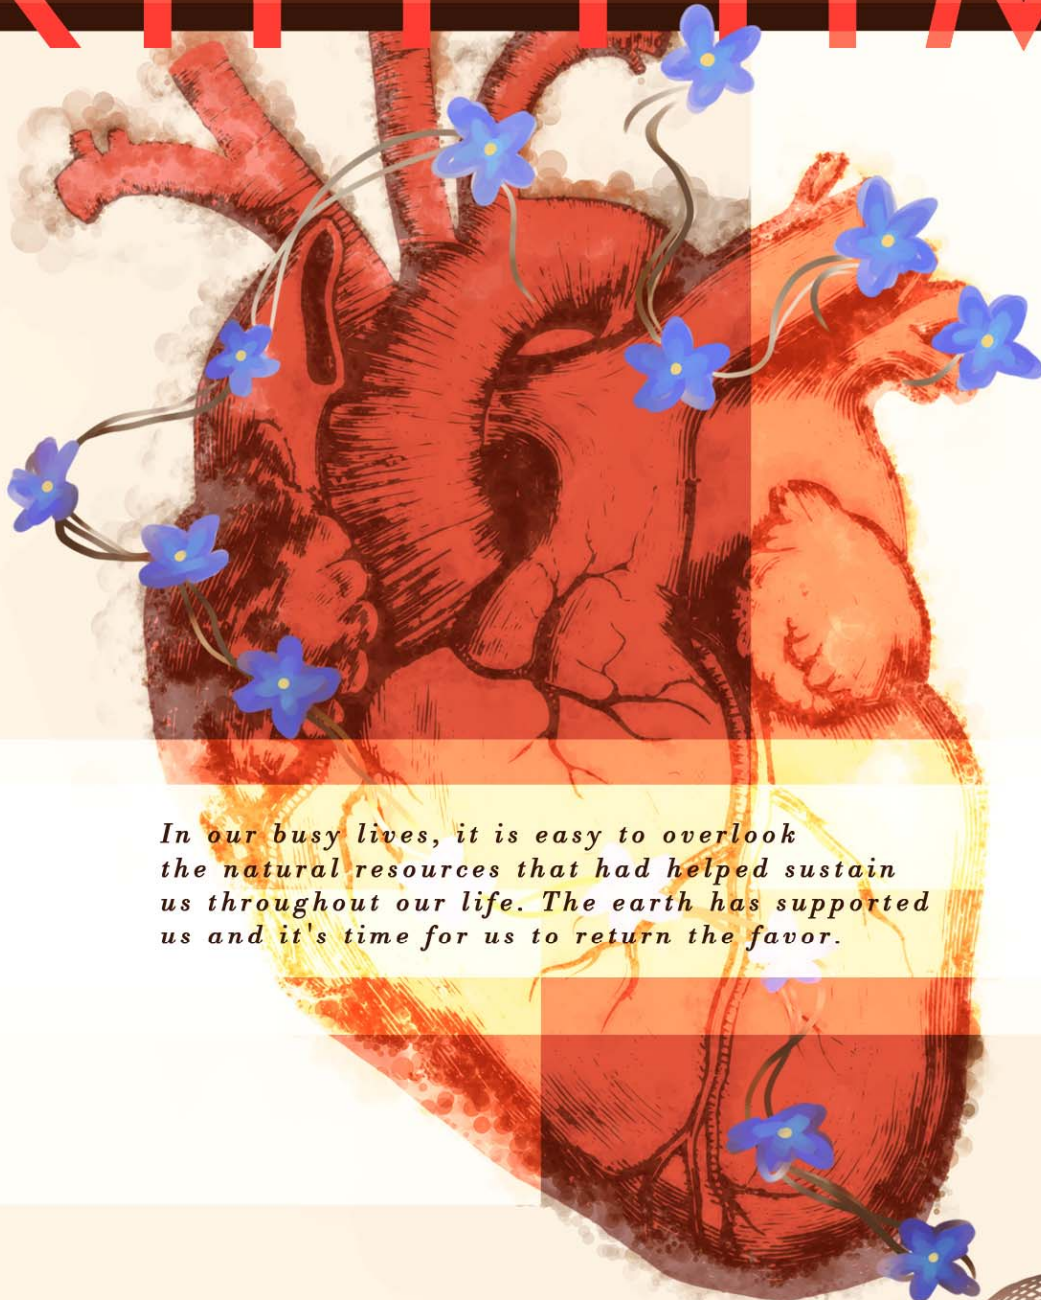

Now is the time to act before the natural beauty around us disappears forever. Remember our resources, do not forget our environment.

A BREATH OF FRESH AIR

the key to life

Imagine a world utterly free of pollutants where each breath is as fresh and pure as new spring. The EOS party is working tirelessly to reverse the damage done to the earth's biosphere before it is too late.
